

SYNTHETIC CLINICAL TRIAL PROTOCOL

Trial ID: SYN-DM-001

Study: A Synthetic Phase II Study of an Investigational Therapy in Adults With Type 2 Diabetes

Inclusion Criteria

1. Participant must be 18 to 65 years old, inclusive.
2. Estimated glomerular filtration rate (eGFR) must be greater than 60 mL/min/1.73m².
3. HbA1c must be between 6.5% and 9.0%, inclusive.
4. Participant must have a documented history of Type 2 Diabetes.

Exclusion Criteria

1. Recent chemotherapy within the previous 6 months excludes participation.
2. Pregnancy excludes participation.
3. Known severe hepatic impairment excludes participation.

Screening Decision Guidance

Each criterion must be evaluated against available patient evidence. If a required clinical value is missing or cannot be reliably determined from the patient record, the screening result must be `REQUIRES_HUMAN_OVERVIEW`. The system must not invent missing medical values.

This protocol is entirely synthetic and is intended only for software testing and demonstration. It is not medical guidance and must not be used for real patient decisions.
